

**Consolidated Copper Corp** is a mining, development, and exploration company, focusing on copper mining in Namibia. The company is seeking to employ suitably qualified candidates for the following positions. The positions are at our Northern Operations, Ongopolo Mining Ltd, Tschudi Mine, Tsumeb.

### **ELECTRICAL SUPERINTENDENT – ENG02 x1**

**Role Purpose:** The Electrical Superintendent, reporting directly to the Engineering Manager, is responsible for the safe, reliable operation and maintenance of all electrical, instrumentation, control, and electronic systems across the Tschudi mining operation, ensuring sustained engineering reliability through the implementation of reliability centred maintenance strategies and techniques. The role entails identifying and managing electrical and electronic asset reliability risks as well as design and installation of new infrastructure for expansion projects in line with all engineering standards.

#### **Key Performance areas:**

- Provide focused leadership and supervision to the Electrical and C&I sections, ensuring effective planning, execution, control, and reporting of maintenance and repair activities to achieve plant availability and performance
- Ensure safe, reliable, and efficient Electrical and C&I plant performance by managing and evaluating safety performance across the Plant Electrical, Instrumentation, and System Integration sections in accordance with Ongopolo Mining Ltd procedures, engineering standards, and statutory requirements.
- Establish, approve, and enforce electrical and C&I standards and operating procedures, ensuring full compliance with applicable legislation and health, safety, and environmental directives.
- Assess operational requirements and oversee the selection, specification, installation, and commissioning of electrical and C&I equipment and technologies, ensuring alignment with engineering best practice and long-term plant reliability objectives.
- Review and recommend electrical and C&I design modifications or improvements to enhance safety, reduce unplanned downtime, and improve overall plant efficiency.
- Manage assigned electrical and C&I projects by identifying short- and long-term improvement or modification initiatives and executing them in line with project management principles.
- Drive continuous improvement in maintenance systems, procedures, and execution practices to enhance equipment performance and extend asset life.
- Coordinate with suppliers, contractors, and OEMs to secure timely technical support and cost-effective solutions to electrical and C&I challenges.

#### **Requirements and Experience:**

- B.Sc / B.Eng / B.Tech in Electrical Engineering; a postgraduate qualification will be an added advantage.
- Registration as a Professional Engineer or Incorporated Engineer with a recognized institution is desirable.
- Minimum of 5 years' relevant experience in a mining or processing plant environment, including at least 2 years in a supervisory role.
- Experience with Asset Management systems and Computerised Maintenance Management Systems (CMMS).
- Proficiency in relevant engineering software

Candidates must be Namibian citizens or holders of Namibian permanent residence permits and should hold a valid Code B (08) driver's license.

Applications for the above position must be accompanied by a detailed CV and non-returnable certified copies of relevant qualifications. Please use the position title and vacancy nr you are applying for as reference.

**CLOSING DATE FOR APPLICATIONS IS 16 JANUARY 2026**

**Ongopolo Mining Limited is an equal opportunity employer**
