

High School Chemistry Teacher

St Paul's College has an exciting opportunity for an innovative and qualified teacher to join the High School Chemistry Department.

Reports to: Head of Chemistry

Position available from: 1 January 2027

Required experience:

- Bachelor of Education (major in Chemistry) **or** a degree in Chemistry plus an Education qualification.
- A minimum of three years' High School teaching experience.

Our ideal candidate will have:

- Experience in the Cambridge International Education curriculum.
- The ability to teach students from Grades 7 to 12 (Lower Secondary, IGCSE and AS Level) and implement educational best practices to develop their potential.
- A classroom management style that promotes critical thinking, effective communication and self-discipline.
- High emotional intelligence and energy.
- Time management and problem-solving skills.
- The ability to build successful relationships with students, parents and colleagues.
- A commitment to uphold the Christian ethos and values of the College.

Duties include:

- Manage the classroom competently for effective learning, encouraging a positive and creative environment.
- Plan, prepare and teach using interactive learning, innovative and creative resources and programmes.
- Design, develop and implement schemes of work and assessment according to education best practices and students' learning needs.
- Participate in professional development to stay up-to-date with current educational trends.
- Facilitate extra-curricular academic support, sport and/or cultural activities.
